

**WHEN
The Money Available For Owning
EXCEEDS**

**The Money Available For Earning,
It creates the ultimate and overall economic condition of
"Impossible To Do" for a number of citizens to do and is
therefore unlawful (or in violation of Article I, Section 8,
Clause 1 - requirement to provide for the general Welfare.)**

The \$100,000 Borrowed/Loaned - equals (=) Money Created by Loan ("MCL")

The MCL is given a standard interest rate yielding a 2.5 times increase over 30 years only as an example. Other interest rates would vary the 2.5 times factor

- * MAFSL - Money Available For Spending (as Created by Loans)
- ** MAFSC - Money Available For Spending (as created by Congress = Currency + Coins)

A proportional increase in MAFSC is not, by way of MAFSL, guaranteed, and is therefore NOT an incorporated part of MAFE for any legal purpose.

It is well established that it is not lawful or legal to do anything that would require a person to commit a criminal act, or that would cause that person to cause another person to commit a criminal act in his or her stead. If a person is unable to legally obtain a thing that is legally required of them to obtain without either committing or causing another to commit a criminal act or acts, then such requirement to obtain is unlawful and therefore illegal upon its discovery. Consequently, when Money Legally Owed and demanded is Impossible to legally Obtain, such Impossible (legally) to Obtain condition = an Impossible (legally) To Do condition or requirement under the law.

Increased # of MAFSL's = Increased National Quasi Public Debt ("NQPD"), which **Increases Risk** of Impossibility To Do (a **Harm** or **Damage**), All Citizens. This is written as Increased Harm/Damage Risk, or "IH/DR."

The National Quasi Public Debt is comprised of all individual PDD's which make their way into National Economy, and the National Civil Harm ("NCH") is increased in direct proportion to the increase of the NQPD. **NQPD : NCH**

For purposes of this Formula, the \Rightarrow symbol signifies "the result" with equal value, and the $\hat{=}$ symbol signifies an increase value understood to be in the amount of X.

THE CRITICAL FORMULA:

MAFSL + IBI \Rightarrow CABI = PDD = $\hat{=}$ CRF = URL

CABI = URL
